Response to Amendment

1. The preliminary amendment filed 12/14/05 has been entered in full.

EXAMINER'S AMENDMENT

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Thomas M. Lundin Reg#48,979 on 9/07/07.

The application has been amended as follows:

In **claim 7**, replace "a computer program for a control unit" on line 1 with --a computer readable medium encoded with a computer program for a control unit--.

Also in **claim 7**, delete "the method claimed in claim 1" on line 3.

The changes were made to correct potential 101 problems.

Allowable Subject Matter

3. Claims 1-7 are allowed.

The following is an examiner's statement of reasons for allowance: None of the prior art discloses in combination with the other limitations of the claim a computer tomography method having the following steps: determination, with the help of redundant measured values, of a complementary measured value for each of at least some of the measured values that were acquired in step c) and that lie within a reconstruction window the rays associated with the given measured value and the

complementary measured value belonging to it being oriented in opposite directions to one another, replacement of each measured value for which a complementary measured value was determined in step d) by a sum comprising the measured value, having been weighted, and the complementary measured value, having been weighted, reconstruction of a CT image of the examination region from the measured values lying within the reconstruction window. Since all of these limitations are present in the independent claims they are all allowable for the same reason.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

USPN 6,327,326 Method for image reconstruction for a computed tomography apparatus.

USPN 4,707,822 Tomographic Apparatus.

USPN 6,233,478 Apparatus for constructing computed tomography image slices of an object undergoing cyclic motion.

USPN 6,829,379 Methods and apparatus to assist and facilitate vessel analysis.
